

Jeffrey Snowden

jeffreysnowden@gmail.com | Dripping Springs, TX

SUMMARY

Dedicated research scientist with extensive experience in mixed-methods research, data analysis, and instrument design. Proven expertise in managing complex research projects and conducting comprehensive analyses using various statistical tools. Skilled in developing and validating research instruments, visualizing complex data, and collaborating across departments to implement data-driven methodologies. Experienced in translating research findings into actionable insights for diverse stakeholders and leading cross-functional teams in large-scale studies.

WORK EXPERIENCE

BSCS Science Learning

Sep. 2015 - Present

Research Scientist

Jan. 2023 – Present

- Conducted mixed-method analyses identifying trends and patterns to inform data-driven decisions.
- Developed a custom R package and various functions to automate WINSTEPS psychometric analyses, improving efficiency and reproducibility of research processes.
- Designed, validated, and implemented research instruments, ensuring data quality and reliability.
- Translated complex datasets into clear visualizations to present findings to diverse stakeholders.
- Managed participant recruitment and data collection strategies to optimize research efforts.
- Led research and evaluation teams in larger projects, collaborating across departments and managing priorities and resources to meet project goals and timelines
- Contributed to proposal writing and developed research design and analysis sections, demonstrating ability to plan and execute comprehensive studies.

Research Associate

Aug. 2018 – Jan. 2023

- Collected research data, cleaned and transformed complex data in preparation for further analysis.
- Collaborated on research design and methodology for various educational studies.

Application Support Specialist

Dec. 2016 – Aug. 2018

- Designed and maintained content for learning management systems, focusing on user needs and usability.

Clerical Assistant

Sep. 2015 – Dec. 2016

Dharma Ocean Foundation

Dec. 2013 – July 2015

Lead Cook

- Led kitchen team in preparing dishes that adhered to dietary restrictions, ensuring quality and compliance.

EDUCATION

University of Colorado, Denver

2020

M.A. Research and Evaluation Methods

- 4.0 GPA. Completed multiple PhD level quantitative methods courses.

University of Colorado, Colorado Springs

2016

B.A. Philosophy & B.A. Communication

- Magna Cum Laude & With Highest Distinction. 3.8 GPA.

SKILLS

Quantitative and qualitative research methods, statistical analysis and data visualization, survey design and validation, research instrument development, data cleaning and transformation, project management and team leadership, technical reporting and research dissemination, R, SPSS, STATA, WINSTEPS, NVivo, data analysis automation and reproducibility, Microsoft Office Suite and Google Workspace, collaborative research across departments, literature review and synthesis, research ethics and participant management, grant proposal writing, experimental research design and psychometric analysis.
